

UNQUALIFIED DISCUSSION ONLY. UPDATED SEPTEMBER 2026

400XY / NAPOLEON STREET

Executive Financing Summary

Feature film + adult animated series franchise. Current deck currency standardized to US\$, with original EUR/CAD figures shown where relevant.

CURRENT FEATURE MODEL

US\$16.25M

€14.29M gross budget

NET AFTER GREEK REBATE

US\$11.94M

€10.50M post-rebate model

CURRENT FINANCING MODEL

US\$17.91M

as per 2026 waterfall

PRIVATE INVESTMENT COMPONENT

US\$7.25M

€6.38M equivalent

FX reference used for display: 1 EUR = 1.1371 USD; 1 USD = 0.8794 EUR. Conversion is indicative only.

Executive Thesis

One property, several working titles, multiple financing paths.

TITLE CONTINUITY

400XY / Napoleon Street

Current investor-facing package for the same underlying screen property previously referenced in legacy materials as 400 Boys / Legend of the Belt.

- Use current names for new investor materials.
- Reference legacy titles only when tying back to rebate, rights, financing, or sales documents.

INVESTMENT STORY

Not just a film raise.

The stronger positioning is an international screen IP with feature history, animation upside, and documented rebate / financing provenance.

- Animation can serve as the faster proof-of-market path.
- Feature pathway remains the higher-upside flagship asset.
- Financing is presented as structured pathways, not one vague all-equity ask.

Evidence status: title continuity is a working presentation position; final chain of title remains a legal due-diligence item.

One IP, Two Paths

The animation and feature paths support each other instead of competing.

A - Animation Series

8 x 30-minute adult animation season
English master + Korean/Mandarin dubbing
SAG-AFTRA voice model + AI-assisted generation / 2.5D
compositing

STRATEGIC FUNCTION

Faster proof-of-market, platform packaging, and lower capital exposure before feature-scale spend.

B - Live-Action Feature

Global tentpole feature path
Greek 40% rebate assumption
Canadian federal / provincial tax-credit history
Hungarian certification history

STRATEGIC FUNCTION

The flagship asset with the most visible upside, supported by prior financing and rebate infrastructure.

Deck logic: animation economics and feature financing must remain separated until a final combined structure is approved.

2026 Feature Budget - US\$ Primary

Original budget is in EUR because the current production model is built around Greece.

GROSS PRODUCTION BUDGET

US\$16.25M

€14.293M original budget

GREEK CASH REBATE ASSUMPTION

US\$4.31M

€3.791M original line item

NET FEATURE REQUIREMENT

US\$11.94M

€10.502M after rebate assumption

Gross budget

Greek rebate assumption

Net requirement

US\$16.25M

- US\$4.31M

US\$11.94M

Important: the Greek rebate is treated as a projected incentive in the draft feature model, not a closed cash receipt until confirmed by counsel/accountants and definitive production financing documents.

FX display rate: EUR/USD 1.1371. Figures rounded. Original source figures remain in EUR.

Current Financing Structure

Use the 2026 waterfall numbers as the active model. Do not mix with older C\$ cashflow drafts.

Source	US\$	EUR equiv.	Notes
7624786 Canada Ltd	US\$1.68M	€1.48M	Producer investment
9077-3755 QC Blonde	US\$0.77M	€0.68M	Producer investment
Production Loan Blonde	US\$1.37M	€1.20M	Producer investment / soft money
Greek Rebate Advance - Foss	US\$3.00M	€2.64M	Secured against tax credit
Federal Tax Credits Advance 90%	US\$1.07M	€0.94M	Secured against tax credit
Provincial Tax Credits Advance 90%	US\$2.77M	€2.44M	Secured against tax credit
Private Investment	US\$7.25M	€6.38M	Cash equity with preferred return
TOTAL FINANCING	US\$17.91M	€15.75M	Balanced in model

Current waterfall source uses US\$ millions. EUR equivalents are indicative at 1 USD = 0.8794 EUR.

Canadian Tax Credit & Bank Evidence

Institutional support history is real; current eligibility still requires updated certification.

SODEC / QUEBEC

Approval history

Historical SODEC material names 9077-3755 Québec Inc. as rights owner and references 400 Boys with eligible special effects / animation bonus costs.

BONUS COSTS EXAMPLE

C\$2.1058M

historical eligible-cost schedule

NATIONAL BANK

90% advance framework

The historical term sheet contemplated advances against Quebec and federal services tax credits, subject to SODEC / CAVCO rulings, CPA reports, and bank conditions.

ESTIMATED FINANCING

C\$7.735M

historical bank term sheet

CURRENT USE

Evidence, not entitlement

Use the Canadian material as evidence that the structure has been previously modeled and bank-reviewed. Do not present it as current certification.

WATERFALL ADVANCES

US\$3.84M

US\$1.07M federal + US\$2.77M provincial

Historical C\$ figures are not converted in this slide because Canadian tax evidence should remain in source currency. Current 2026 waterfall uses US\$.

International Financing Provenance

Separate documented history from current assumptions and open verification items.

CURRENT DRAFT

GREECE

US\$4.31M / €3.79M rebate line

40% rebate assumption in 2026 feature budget; not a closed cash receipt.

DOCUMENTED HISTORY

HUNGARY

HUF 1.084B spend / HUF 270.9M rebate

Prior Hungarian Film Office certification under legacy title material.

DOCUMENTED HISTORY

CANADA

C\$1.7M + C\$4.4M modeled rebates

Prior federal / provincial tax-credit model and bank advance mechanics.

DOCUMENTED HISTORY / TO RECONCILE

CHINA

C\$6.5M listed in historical structure

Historical 400 structure names China / Construction Bank; separate Tianjin co-production relationship needs project-specific reconciliation.

Do not call historical financing components current commitments unless corresponding updated documents are in the diligence folder.

Animation Season 1 Economics

Production cash cost is separate from buyer-positioning license value.

Lean

US\$1.17M

(€1.03M)

Target

US\$2.01M

(€1.77M)

working case

Premium

US\$3.35M

(€2.95M)

BUYER-POSITIONING MODEL

US\$9.10M

€8.0M positioning value
(€1M × 8 episodes)

Not a signed license or contracted revenue unless supported by platform documentation.

Key investor-safe line: the animation model creates a lower-cost route to package and test the IP before feature-scale capital, while preserving the larger feature / franchise upside.

FX display rate: EUR/USD 1.1371. Buyer-positioning value is a model, not confirmed revenue.

Commercial Context

Use historical projections carefully; they support market logic, not booked revenue.

ATLAS PROJECTIONS - HISTORICAL

US\$23.2M

projected "Take"

US\$37.1M

projected "Ask"

Atlas projections exclude China and Latin America and should be described as historical sales estimates, not presales.

BUYER / PLATFORM CONTEXT

Adult animation + sci-fi tentpole

Netflix, Amazon, Tencent Video / WeTV and related platform names should appear only as market-context or discussion-context unless emails, offers, term sheets or contracts are added to the data room.

PRODUCT PLACEMENT

US\$9.05M historical estimate

The product-placement document is useful support, but remains a negotiation estimate unless signed placement contracts exist.

Slide language must distinguish projections from signed sales or platform commitments.

Investor Entry Points

Offer three doors. Let capital choose its risk, duration and upside.

Animation First

CAPITAL

US\$1.17M - US\$3.35M

MECHANICS

Finance Season 1 / proof package

ADVANTAGE / CONTROL

Faster route to market discussion; establishes IP viability before feature-scale capital.

Incentive Bridge

CAPITAL

TBD after certification

MECHANICS

Senior / first-position bridge against verified incentives

ADVANTAGE / CONTROL

Structured path only after CPA/legal confirmation, certification, security documents, and repayment source validation.

Feature / IP Equity

CAPITAL

US\$7.25M current private-investment component

MECHANICS

Participate in feature and broader IP upside

ADVANTAGE / CONTROL

Highest upside; requires final rights, waterfall, production documents, and investor terms.

No path is offered as closed legal terms. Each requires definitive documents and counsel review.

Due Diligence Spine & Claim Control

This deck is strongest when every claim is either documented, indicative, or flagged for verification.

DOCUMENTED / IN DATA ROOM

- 2026 preliminary budget figures
- SODEC / National Bank historical evidence
- Hungarian rebate decree / translation
- Atlas and product-placement projections
- Animation workbook calculations

INDICATIVE / MODELLED

- Greek rebate and advance mechanics
- Current financing waterfall structure
- Canadian tax-credit model history
- Animation buyer-positioning value
- Platform / buyer context

TO VERIFY BEFORE TERM SHEET

- Current tax-credit certificates
- China private investment evidence reconciliation
- Final chain of title and signing authority
- Closed waterfall and security package
- Platform correspondence / offers

Proceed to data room / legal review before any investor-facing commitment language.
